

## Community heat metering

**HeatPlus** ... the new wireless heat metering system from **LanTen**.

# LanTen..

is an energy management company focused on community housing systems where landlord energy supplies multiple tenants.

## Lanlords

Lanten's services will be of interest to landlords of both existing community housing stock with revenue shortfalls and planned developments with community energy systems.

### The Problem With Community Energy Systems to date:

- Landlord unable to recover energy costs
- Standing charges are not recovered
- Tenants are burdened with credit
- Billing and management is time consuming and costly
- Complex billing systems, expensive installations and wiring

## Tenants

Tenants need accurate, instant energy information in order to manage finances and avoid the pitfalls of fuel poverty. By displaying exact energy usage in a simple, easy to understand display, tenants can budget better.

### The HeatPlus Solution:

- Accurate billing with 'pay-as-you-go' or 'credit' modes.
- Energy costs recovered
- Standard charge facility
- Tenants control their costs
- Automated billing
- Low running costs
- Simple installation
- Easy retrofit with wireless installation
- Fast payback

HeatPlus

ELECTRICITY

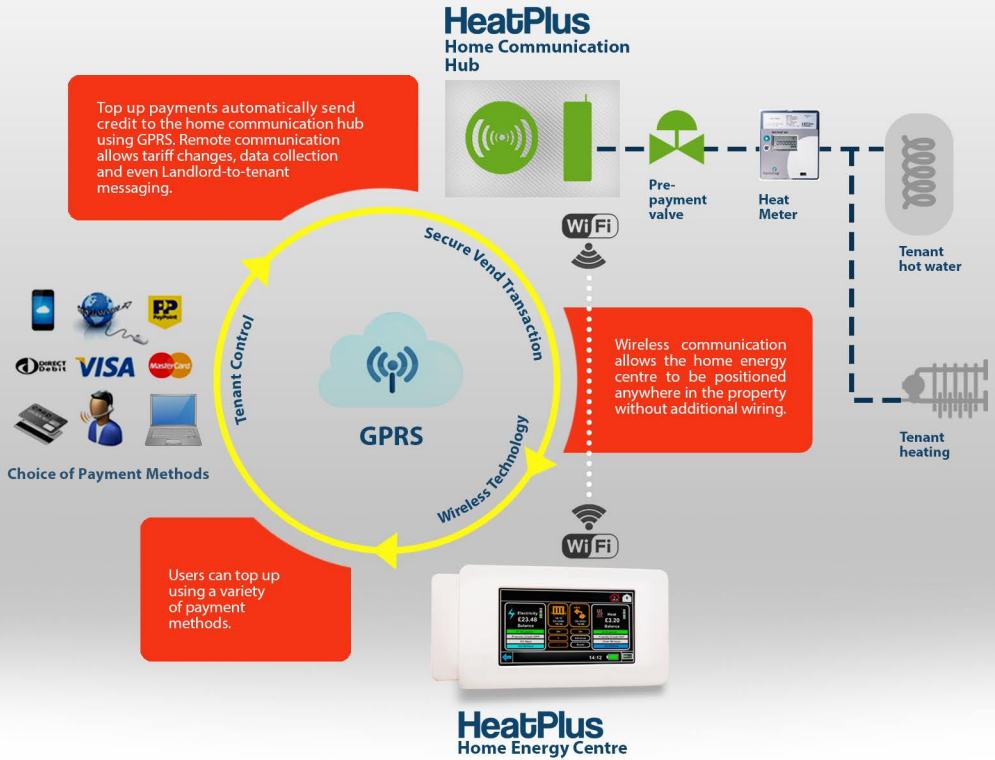

### New or existing schemes:

Whether the scheme is a new development or there is a problem with consumer credit debt on an existing community network, we can help.

Because **Heatplus** uses wireless GPRS technology, we can retrofit our equipment into most buildings along with the associated metering and control hardware

**Heatplus** has a unique debt recovery tariff that can recover historical debt over a manageable time period whilst also maintaining instantaneous payments.

## System Overview

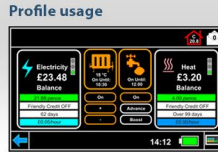

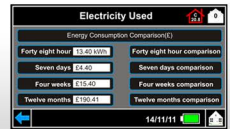

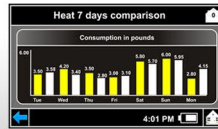

## Unique Features of the HeatPlus System:

- Low operating costs
- Heat, gas, electricity or water metering.
- 'Pay as You Go' or 'credit mode'.
- Remotely interchangeable mode without site visit.
- Credit payments by SMS.
- Accredited to ISO 27001.
- Automated self-connect/ disconnect
- Friendly credit periods.
- Debt recovery.
- Wireless technology.

## Benefits of the HeatPlus System:

- Fully automated system enables low operating costs and less debt risk.
- One system fits all sites.
- Automated and secure payment system.
- Compliant with international banking security standard.
- Tenants manage payment and fuel usage.
- No disconnection out of hours.
- Tenants can select emergency credit.
- Historical debt can be recovered.
- Simple retrofit with wireless technology.

Smart technology

Fail-safe Vending

# Relax..... let HeatPlus give you financial control.

A range of payment options for tenants...

## A smarter way to pay

Customers in pay-as-you-go mode can top-up anytime, anywhere so there's no longer a need for a local point-of-sale outlet, or the restrictions of shop opening hours - they don't even need to leave the house. This avoids the high operating and administration costs that are normally associated with other pay-as-you-go energy schemes.

Using instant wireless technology we can provide fast, fair, low cost and flexible payment options.

## Consumer choice

With flexible payment options, the **Heatplus** system accommodates both monthly billing and pay-as-you-go modes, acting as a data collector, smart payment device and home energy manager.

Every tenant within a community energy scheme can benefit from the **Heatplus** system and everyone pays the same fair energy price.
